Education

National Institute of Technology, Delhi 2021 – 2025
Bachelor of Technology – Electrical and Electronics Engineering

Experience

Skeps June 2025 – Present
Software Engineer *Gurugram, India*

- Designed and maintained **REST APIs** powering the end-to-end loan origination workflow (eligibility, offer generation, application intake, status tracking) using **Node.js**, **Express.js**, and **MySQL**.
- Engineered an internal **Sentry monitoring service** that scans production alerts across microservices and generates daily service-wise reports, replacing manual monitoring and reducing triage effort by **90%**.
- Reduced API response latency by **∼30%** by optimizing complex SQL queries, adding targeted database indexes, and implementing **Redis caching**, improving throughput for high-volume loan-processing APIs.
- Developed a **self-service merchant onboarding platform** that automated merchant, store, and environment provisioning, cutting onboarding time from **hours to minutes** and eliminating manual engineering intervention.
- Integrated third-party **fraud detection** and **identity verification (KYC)** providers into the loan approval pipeline, enabling faster verification and stronger fraud screening.
- Implemented authentication and authorization using **JWT**, **RBAC**, and password hashing across lender, merchant, and admin portals, working across multiple **microservices** in an **event-driven architecture**.

Technical Skills

Languages:	Java, JavaScript, Python, C++
Backend:	Spring Boot, Spring Security, Node.js, Express.js, REST APIs, Microservices
Agentic AI:	LangGraph, LangChain, Multi-Agent Systems, RAG, LLM Tool Calling, LangSmith
Cloud & DevOps:	Docker, Kubernetes (GKE), Kafka, Redis, CI/CD (GitHub Actions, Jenkins), Git, Linux, AWS
Databases:	PostgreSQL, MySQL, MongoDB, Qdrant (Vector DB)
Core CS:	Data Structures & Algorithms, System Design (HLD & LLD), OOP, DBMS, Operating Systems

Projects

Prompt2Prod (Distributed AI Code Assistant Platform) | *Java, Spring Cloud, Kafka, Qdrant, Kubernetes* Link

- Architected a distributed AI coding platform spanning **6 Java/Spring Cloud microservices** (Gateway, Config, Discovery, Account, Workspace, Intelligence) with centralized gateway routing and runtime configuration served from a **Git-backed Config Service**.
- Engineered a **RAG pipeline** that chunks, embeds, and indexes entire codebases into **Qdrant** for semantic retrieval, streams LLM responses to the React UI token-by-token over **SSE**, and uses **LLM tool-calling** to fetch only required files from **MinIO** behind a **circuit breaker**.
- Decoupled AI generation from storage with **Kafka** event streaming (files in MinIO, metadata in **PostgreSQL**, **Redis** caching) and ran isolated per-project runner pods on **Kubernetes** with a sidecar syncing files for hot-reload previews.

Agentic Blog Generator | *Python, LangGraph, LangChain, Gemini, Tavily, LangSmith, Streamlit* Link

- Built a **multi-agent blog generation system** using **LangGraph**, where an LLM routes topics to web research and generates planned blog sections **in parallel**.
- Designed a **fault-tolerant image generation workflow** with concurrent image creation, independent task failures, and placeholder fallbacks to keep the pipeline running.
- Used **Pydantic structured outputs** for reliable LLM responses, **Tavily** for web research, and **LangSmith** for end-to-end tracing; built a Streamlit UI with automated **AppTest** validation.

Achievements

- **LeetCode Knight** – rating **1857** (top 5.9%); **1000+ DSA problems** solved across LeetCode, Codeforces, and CodeChef.
- Secured **Global Rank 588** in LeetCode Weekly Contest 437 among **30,000+** participants.
- Achieved **All India Rank 42** out of 300,000+ students in the Naukri.com Aptitude Test.
- Ranked **top 2%** in JEE Main and **top 1.5%** in JEE Advanced (2021) among 1M+ candidates.
- **Team captain** for NIT Delhi at the All India Inter-NIT Cricket Tournament.
