Aman Raj

Backend Software Engineer · Distributed Systems · GenAI

+91 9955673334 | amanraj363738@gmail.com | LinkedIn | GitHub | Portfolio | LeetCode

Education

National Institute of Technology (NIT) Delhi — **2021 – 2025**
Bachelor of Technology in Electrical and Electronics Engineering — *New Delhi, India*

Experience

Skeps *(Point-of-Sale Consumer Financing Platform)* — **June 2025 – Present**
Software Engineer I — *Gurugram, India*

- Built backend services powering the end-to-end **loan origination pipeline** (eligibility, offer generation, application processing, transaction status tracking) in **Node.js**, **Express.js**, and **MySQL**, serving multiple lenders and merchants.
- Cut latency of high-volume financial transaction APIs by ∼**30%** through **SQL query optimization**, targeted **database indexing**, and **Redis caching** on hot read paths.
- Engineered a **self-service merchant onboarding platform** automating merchant, store, and environment provisioning, reducing onboarding time from **hours to minutes** with zero manual engineering effort.
- Built an internal **production monitoring service** aggregating **Sentry** alerts across microservices into daily service-wise reports, reducing incident triage effort by **90%**.
- Developed an **AI pull request review agent** with **LangChain** and **LangGraph** that analyzes code diffs, flags potential bugs and standards violations, and posts structured review comments to automate first-pass reviews.
- Secured lender, merchant, and admin portals with **JWT authentication**, **role-based access control (RBAC)**, and salted password hashing across **3 microservices** in an **event-driven architecture**.

Projects

Prompt2Prod (Distributed AI Code Assistant) | *Java, Spring Boot, Spring Cloud, Kafka, Kubernetes* — GitHub

- Architected **6 Spring Boot / Spring Cloud microservices** (Gateway, Config, Discovery, Account, Workspace, Intelligence) with gateway-based routing, service discovery, and runtime config from a **Git-backed Config Service**.
- Built a **RAG pipeline** that chunks, embeds, and indexes full codebases in **Qdrant**, streams responses over **SSE**, and uses **LLM tool calling** to fetch only required files from **MinIO** behind a **circuit breaker**.
- Decoupled generation from persistence via **Kafka** (files in MinIO, metadata in **PostgreSQL**, **Redis** caching) and ran **isolated per-project runner pods** on **Kubernetes** with a sidecar enabling hot-reload previews.

Agentic Blog Generator (Multi-Agent System) | *Python, LangGraph, LangChain, Gemini, LangSmith* — GitHub

- Orchestrated a **multi-agent LangGraph workflow** for planning, **Tavily** web research, and drafting, with **conditional routing**, parallel section generation via `Send` fan-out, and custom **state reducers**.
- Isolated image generation in a **nested subgraph** with **per-task failure isolation** and fallbacks so provider errors degrade output instead of failing the run; enforced typed I/O via **Pydantic structured outputs**.

Technical Skills

Languages:	Java, JavaScript, Python, C++, SQL
Backend:	Spring Boot, Spring Cloud, Spring Security, Node.js, Express.js, REST APIs, Microservices
Distributed & Cloud:	Kafka, Redis, Docker, Kubernetes (GKE), AWS, CI/CD (GitHub Actions, Jenkins), Git, Linux
Databases:	MySQL, PostgreSQL, MongoDB, Qdrant (Vector DB)
GenAI:	LangChain, LangGraph, RAG, Multi-Agent Systems, LLM Tool Calling, LangSmith
CS Fundamentals:	Data Structures & Algorithms, System Design (HLD & LLD), OOD, DBMS, Operating Systems

Achievements

- **LeetCode Knight** (rating **1857**, top 5.9%) with **1000+ DSA problems** solved across LeetCode, Codeforces, and CodeChef; **Global Rank 588** of **30,000+** in LeetCode Weekly Contest 437.
- **All India Rank 42** among 300,000+ candidates in the Naukri.com Aptitude Test.
- Ranked in the **top 2%** in JEE Main (1M+ candidates) and **top 1.5%** in JEE Advanced (2021).
- Represented **NIT Delhi** at the **All India Inter-NIT Cricket Tournament**.
